

1994 Keith Eade - Flybridge

Price: \$195,000

VESSEL – SELLING POINTS

This Keith Eade Custom Designed Flybridge launch was built for her original owner in 1994, and it is abundantly clear that a lot of time and money was invested in building the boat of his dreams. The current owners purchased it from him in December 2019. It has a beautiful white interior which is what attracted them to her. The white makes her look modern, clean, and spacious. She has a Northern Lights generator, a Bauer dive compressor, and the largest fridge this broker has seen in the galley of a vessel like this one, also providing ample freezer space and lots of storage. The engines were fully rebuilt the year the current owners purchased her, and they also updated her electronics package to the latest Furuno electronics. This vessel really is a special boat, and she gets lots of comments on how good she looks.

The purchase of the Pine Harbour marina berth is also an option.
