MAXWELL

RC ROPE/CHAIN SERIES

Maxwell's all new RC series windlasses proudly follow in the highly successful footsteps of the Freedom, Liberty and HRC fully automatic rope/chain anchor winches. RC10 and RC8 are available in both capstan and low profile versions. RC6 is available in low profile version only.

The all new RC12 Series incorporates Maxwell's latest stylish innovation in automatic rope/chain technology. Retaining the classic open design styling more appropriate on larger boats, the RC12 Series represents the next generation of rope/chain windlass evolution in every respect.

Every Maxwell automatic rope/chain windlass is available with all the necessary components for fully automatic dual direction control in a competitively priced package.

TASMAN SERIES DRUM WINCH

Secure anchoring using high quality marine galvanised chain

Plain Bearings

Reliable operation with high load capacity and minimal maintenance required

Max-Warp

Secure anchoring through high strength rope with stretch to reduce shock loading

Durable Drum

High strength large diameter Duplex stainless steel shaft with 316L flanges

Proven Motor

High performance motor with a history of rugged reliability in Maxwell product

Maxwell Gearbox

Rugged gearbox to suit large shafts with ratio optimised to give best performance

Aluminium Legs

Engineered design for superior strength with marine anodising avoiding corrosion

VC VERTICAL CAPSTAN SERIES

The VC Series is designed for simple, low cost anchor recovery on smaller boats and rope hauling on larger vessels.

ANCHORMAX CAPSTAN WINCH

An extremely versatile vertical capstan or general purpose electric winch for use as an anchor winch, pot hauler or davit winch.

VW VERTICAL WINDLASS SERIES

New For 2012

The VW10 evolved from the demand for a vertical windlass that could be used in a horizontally installed configuration but which would also, interactively handle a rope/chain rode. The traditional VW models could be used **with chain only rodes. The VW10, capable of handling up to 10mm (3/8") chain and 16mm (5/8") rope** is ideally suited for use in sailing boat anchor lockers, where space considerations are critical.

Quick and easy to install and available with our without independent warping capstan, the VW10 is destined to become an instant hit in this unique niche market

VWC 3500 MODELS ARE AVAILABLE
WITH OPTIONAL EASY TO USE
BAND BRAKE

VWCLP 1500
LOW PROFILE VERSION

**VWC 3500 without
Band Brake**

VWC VERTICAL WINDLASS AND CHAINPIPE SERIES

The VWC Series is designed for automatic vertical handling of chain only anchor rodes while offering an independent capstan for the retrieval of a secondary rope and chain rode or to assist with docking procedures.

HRC FF ROPE/CHAIN SERIES

The all new compact HRC FF are Maxwell's horizontal versions of the latest innovative new vertical RC6 and RC8 automatic rope/chain windlasses. The new HRC FF are packed with original and proven features including patented rode management technology developed by Maxwell.

Maxwell's Revolutionary New Chainwheel.

Maxwell once again leads the market in innovative thinking with the introduction of their latest Wave Design™ chainwheel. This patented rope/chain wheel incorporates two unique design concepts that greatly improve the handling and control of the rope/chain spliced rode. The outer ribs of the chainwheel are angled slightly forward ensuring that the rope and the chain are smoothly guided in the wheel during anchor retrieval.

As the rope pulls into the wheel, the opposite facing inner ribs grip the rope in an undulating manner, securing the rope more firmly in a 'wave pattern' action that is far superior to the traditional 'jam cleat' manner of holding the rope compared to all other products on the market. Not only does this Wave Design™ hold the rope more securely, it is also kinder on the rope resulting in increased longevity of your anchor rode.

HRC10 ROPE/CHAIN SERIES

Maxwell's all new HRC10 Horizontal Series represents yet another breakthrough in performance and anchor handling excellence. These horizontal, fully automatic rope/chain windlasses have been designed to meet the demands for use on larger vessels up to 16 metres (52 feet), which require a **completely above deck installation system**. The HRC10's flawlessly handle rope up to 16mm (5/8") and chain up to 10mm (3/8") in size, including the thick rope to chain splice. The modern appearance of the HRC10 Series retains the classic good looks of previous Maxwell horizontal windlasses, while incorporating design features years ahead of its competitors.

HWC SERIES

The HWC Series is designed for automatic horizontal handling of chain only anchor rodes while offering an independent capstan for the retrieval of a secondary rope and chain rode or to assist with docking procedures.

When it comes to anchoring, Maxwell provides the ultimate anchoring solution backed by sound advice and after sales service. A full range of anchoring accessory items are available. Please contact your nearest Maxwell office or local distributor for helpful advice and assistance.

Maxwell will supply not only your anchor winch or capstan, but also a complete anchoring package consisting of control gear, circuit protection, anchors, rope, chain, chain stoppers, chain snubbers, swivels, shackles, bow rollers, etc.

Accessories Positioning Guide

The correct installation of your Maxwell windlass or capstan and all associated anchoring equipment will ensure that you get years of trouble free service. It is worth taking the time to install all accessories and electrical wiring or hydraulic connections carefully and professionally. Your Maxwell Owner's Manual will provide you with all the information you, or your service agent, needs to properly set up your specific installation. The indicative diagram gives you some idea of what is involved and is a guide only.

Note: All the accessories shown are not necessarily available from every Maxwell warehouse. Please contact your nearest Maxwell office for availability.
