SWI-TEC®

A lot of news from our company

This year we convince not only with our innovative products but also with our new and fresh look. Catalogue and Online-Shop blaze in a new layout and you can find us on all current social media channels.

In 2011 we transformed SwissTech into SWI-TEC in order to integrate it under one common roof with our manufacturing company Neveta Náutica S.L. SWI-TEC stands for ‚Special. Water. Innovation‘, i.e. for everthing related to practical, clever and unique ideas around vessels and water.

For over 20 years our philosophy has remained unchanged: We develop special products for everyday use on board to make life a little easier for you. We use high-quality materials for production so as to offer you yacht accessories with extreme durability and high quality – our products are there to make you enthusiastic every time you use them.
All products from Neveta Náutica that are presented under the SWI-TEC trademark are designed, produced, tested and marketed by our team.

Follow our mascot Maxi through the catalogue and he will give you for sure some very nice tips, including our SWI-TEC video animations which you can find on our website.

We hope that you will enjoy our new catalogue – and may there always be an inch of water under your keel!

Your SWI-TEC crew

Content and News 2017-2018

SWI-TEC Mastlift

Give yourself a lift!

- Safe mast climbing
- Work alone at the top of the mast
- Both hands are always free
- No need for extra mast fittings
- Just hoist the Mastlift on the halyard of your choice (preferably two halyards for extra security)
- Reduction ratio: 10 : 1
- Multi purpose - Man overboard Recovery, General hoist
- Available in two sizes (height of mast: to 45ft and to 82ft)
- **NEW: German Lloyd certified**

The endless line is included.

Please give us the exact mast height when placing an order.

SWI-TEC Mastlift

Art. No.	1001	1002
Useful height:	to 13m	to 25m
Gear ratio:	1:10	1:10
Weight:	6,7 Kg	7,6 Kg
Size:	Ø = 165 mm; L = 215 mm	
	Ø = 185 mm; L = 215 mm	
Permitted		
Live Load:	150 Kg	150 Kg
Breaking Load:	2100 Kg	2100 Kg
Material:	Stainless steel (V4A), aluminium, high impact plastic	

Video Demo www.swi-tec.com

Mastlift Accessories: Protective Cover

We recommend our Neoprene Protective Cover to protect the unit and your mast.

Protects:
- the unit and the mast from impacts during operation
- the unit during storage
- eliminates chafing at the masthead

Protection Cover

Art. No.	1005
Sizes:	for 13 m and 25 m mastlift
Material:	7 mm neoprene

SWI-TEC®

Mastlift Accessories: Guide Roller

Allows the use of mastlift at sea!

- To be used around the furled genoa or jib
- Using the Guide Roller will prevent the mastlift hitting the mast
- Can also be used as a guide for light sails

Guide Roller

Art. No.	1003
Material:	Turned from solid beech wood, cable stainless steel
Size:	700 mm

Mastlift Accessories: 4 m Endless Line

May be used as a hoist in the following situations!

- Man over-board retrieval
- Lifting an outboard motor or recovery of a dinghy
- Lifting heavy equipment for example, batteries and generator etc.

4 m Endless Line

Art. No.	1004
Size:	4 m
Line:	Ø 10 mm spliced

Mastlift Accessories: Masthead Harness

Enables you to work above the masthead!

- The Masthead Harness ensures safety as you work at the masthead
- Ideal for the installation or repairs of masthead equipment
- Adjustable to any body size

Masthead Harness

Art. No.	1006
Material:	50 mm polyester
Load:	1000 kg

Mastlift Accessories: Universal Bag

A sturdy, attractive and versatile bag on board or at home!
- The mastlift is always at hand
- The perfect bag for the mastlift and its accessories
- Keep dampness out

Universal Bag

Art. No.	3009
Material:	cotton and polyamid blend with foam rubber inside
Weight:	1 kg
Size:	400 x 250 x 250 mm

Bosun's Chair «Standard» and «XXL»

Safe and comfortable!
- With stitched-in wooden board
- Comfortable to sit on for hours of work
- Safe even if unconscious
- Strong fabric and workmanship
- 4 sewn-on bags for power tools, rigging tools, nuts and bolts etc.
- Sewn-in stainless steel shackle
- Compact storage bag included
- Fittings to hold drill
- Additional stitched loops for tools

★ **A great asset to your safety, our Bosun's Chairs are safe even in the event of loss of conscioness.**

XXL-Design

- Addition: Adjustable back-rest
- Larger wooden board
- Wider

Bosun's Chair

Art. No.	2001	2000
Bosun's Chair:	«Standard»	«XXL»
Weight:	2 kg	3,7 kg
Permitted Live Load:	150 kg	170 kg
Strength of load bearing line:	2170 kg	3000 kg
wooden board:	15 mm	20 mm
Material:	Cotton-polyamid blend, water resistant	
Waist circumference:	125 cm	145 cm

SWI-TEC Lifting aid for wheelchair users

Mast lift with special seat for wheelchair users

Getting on board from a wheelchair: Now it becomes easy and safe. The newly designed, faint-safe seat makes life easier for people with disabilites. Now it becomes so easy and safe for wheelchair users or for persons who find the railing an unsurmountable obstacle to go on board or off board.

- Makes it easy and safe for people with disabilities to experience sailing
- Exclusive: We have a special lift system for use on board
- Smooth and safe transfer from the landing stage to the vessel
- No mast fittings required
- When required simply hook the unit on the main boom or mizzen boom
- Reduction ratio 1:10
- Most versatile – also for man overboard maneuvers

The Mastlift Art. 1001 and 1002 is not included and must be ordered seperately.

Lifting aid

Lifting aid for wheelchair users

Art. No.	5091
Weight:	1,8 kg
max. load (person):	150 kg
Material:	Cotton/polyamide mix
	Polyester belts
	Stainless steel cross-bar,
	spring hook and rings

SWI-TEC®

Mast Ladder

Perfect for small masts!

- Adjustable rollers to adapt to mast-section
- Work single handed at the top of the mast
- Simple application
- No fittings necessary
- Attaches to any mast
- Perfect control with track slides

Bag for ladder

Important:

When climbing use safety line and a second person!

Mast Ladder

Art. No. 5001	Mast Ladder
for mast heights up to 10 m /16 steps	
Art. No. 5002	Ladder extension
2 m ladder length / 5 steps	
Art. No. 6006	Bag for ladder
	100% PVC

Mast Steps stainless steel or plastic

The alternative way to the top!

Fixed Mast Steps in stainless steel

- Includes ring for the guide line
- Simple and strong construction
- V4A Stainless steel
- Well designed
- Blends in with the mast
- Universal fit
- Light weight

Folding Mast Steps in plastic

- Suitable to use in conjunction with the SWI-TEC mastlift instead of the masthead harness
- Reinforced plastic / nylon
- Easy to open and fold
- Does not rattle
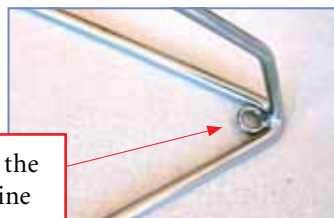

ring for the guide line

Mast Steps

Art. No.	1009	1068	2002 Rivets
Mast Steps:	»stainless steel«	»plastic«	Monel
Material:	stainless steel (V4A)	GfK / Nylon	
Fixings:	6 drill-holes	5 drill-holes	
Sizes:	200 x 200 x 170 mm	148 x 77 x 35 mm	4,8 x 16 mm
Weight:	170 g	164 g	

Hydro Charger

Now you can have enough power on board with our new Hydro Charger

Charge your batteries under sail by lowering the generator in the water

Combined water power and solar power with an intelligent Converter Charger

- For 12/24 Volts systems
- Programmable idler neutral gear voltage e.g. 14,4 V
- 40 A / 12 V maximum current
- Max. current programmable depending on battery capacity
- Programmable converter charger with digital display
- Solar panel connection up to 200 W / 16 A
- 20 A / 12 V socket for watermaker, inverter 220 V / 50 Hz for charging
- cellular phones, TV, PC etc.
- **2 models available: standard and with an additional adjustable release to prevent collision damage**

NEW: Now also available for reverse transom

NEW
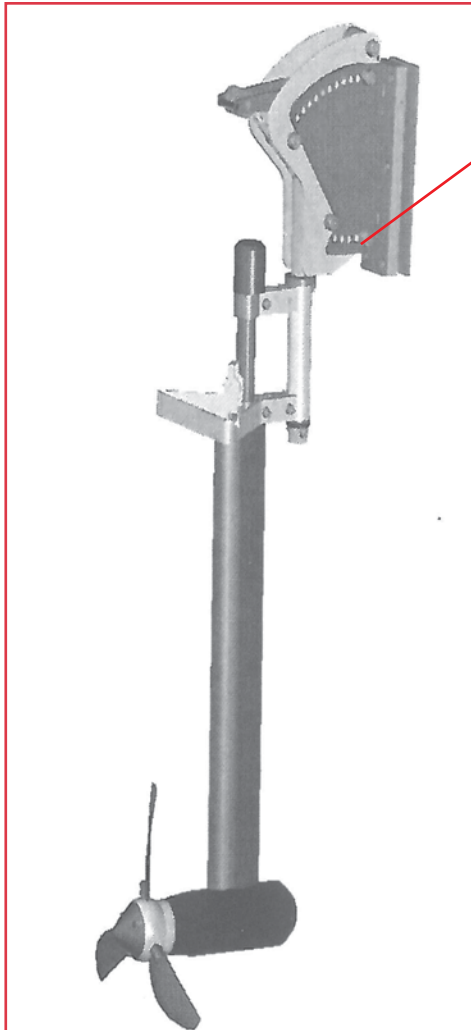

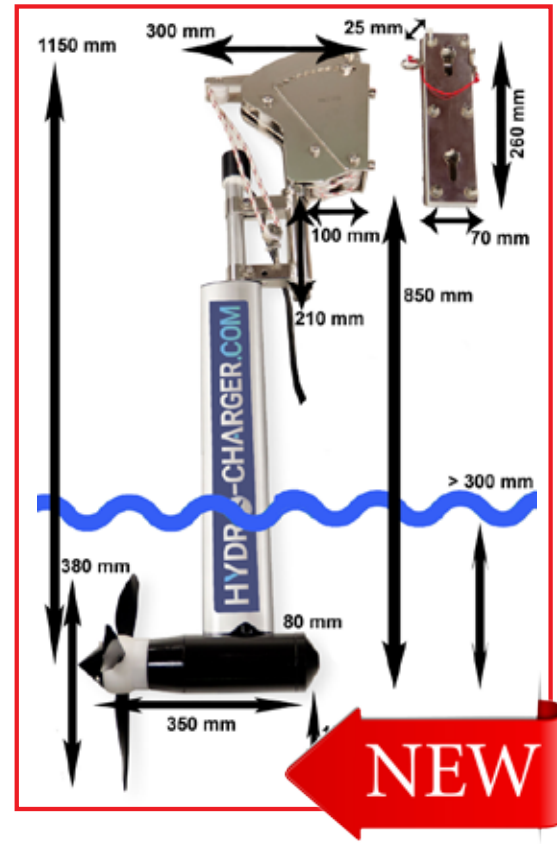

Generator

- Smooth running through custom-designed planetary gear
- Low ratio prevents high motor speeds
- Optimized efficiency through custom-designed transmission
- Double seals (2 O-rings each)
- Multiple-bearing propeller shaft
- Easy to remove and disassemble
- Hard anodized aluminium housing and synthetic cover.
- Streamlined anodized aluminium body
- All screws (A4) are additionally protected against corrosion by Duralac
- No propeller forces transmitted to the gearbox due to special coupling
- Almost inaudible in the water
- Charging from 4 knots upwards (depending on the pitch setting of the propeller blades)

Video Demo
www.swi-tec.com

Hydro Charger

Propeller

- Main body manufactured in a solid synthetic material
- Stove enamelled aluminium propeller blades.
- Blade angle is infinitely adjustable depending on type of the boat (speed)
- Propeller blades are replaceable (i.e. after collision)
- Blades CFD (software for numerical solutions) are designed specifically for generator with optimized form and twisting.

Regulator

- Up to 16/32 volt adjustable, perfect to compensate voltage loss
- With built-in free wheel (propeller turns freely when the max. retained battery voltage is reached)
- Additional connection for solar panels or wind generator
- Additional connection for direct output, which will be automatically shut down when it has sufficient battery voltage.
- **NEW**: integrated digital display
- **NEW**: additional switch for free wheel
- **NEW**: additional alarm when battery is completely charged
- **NEW**: more output
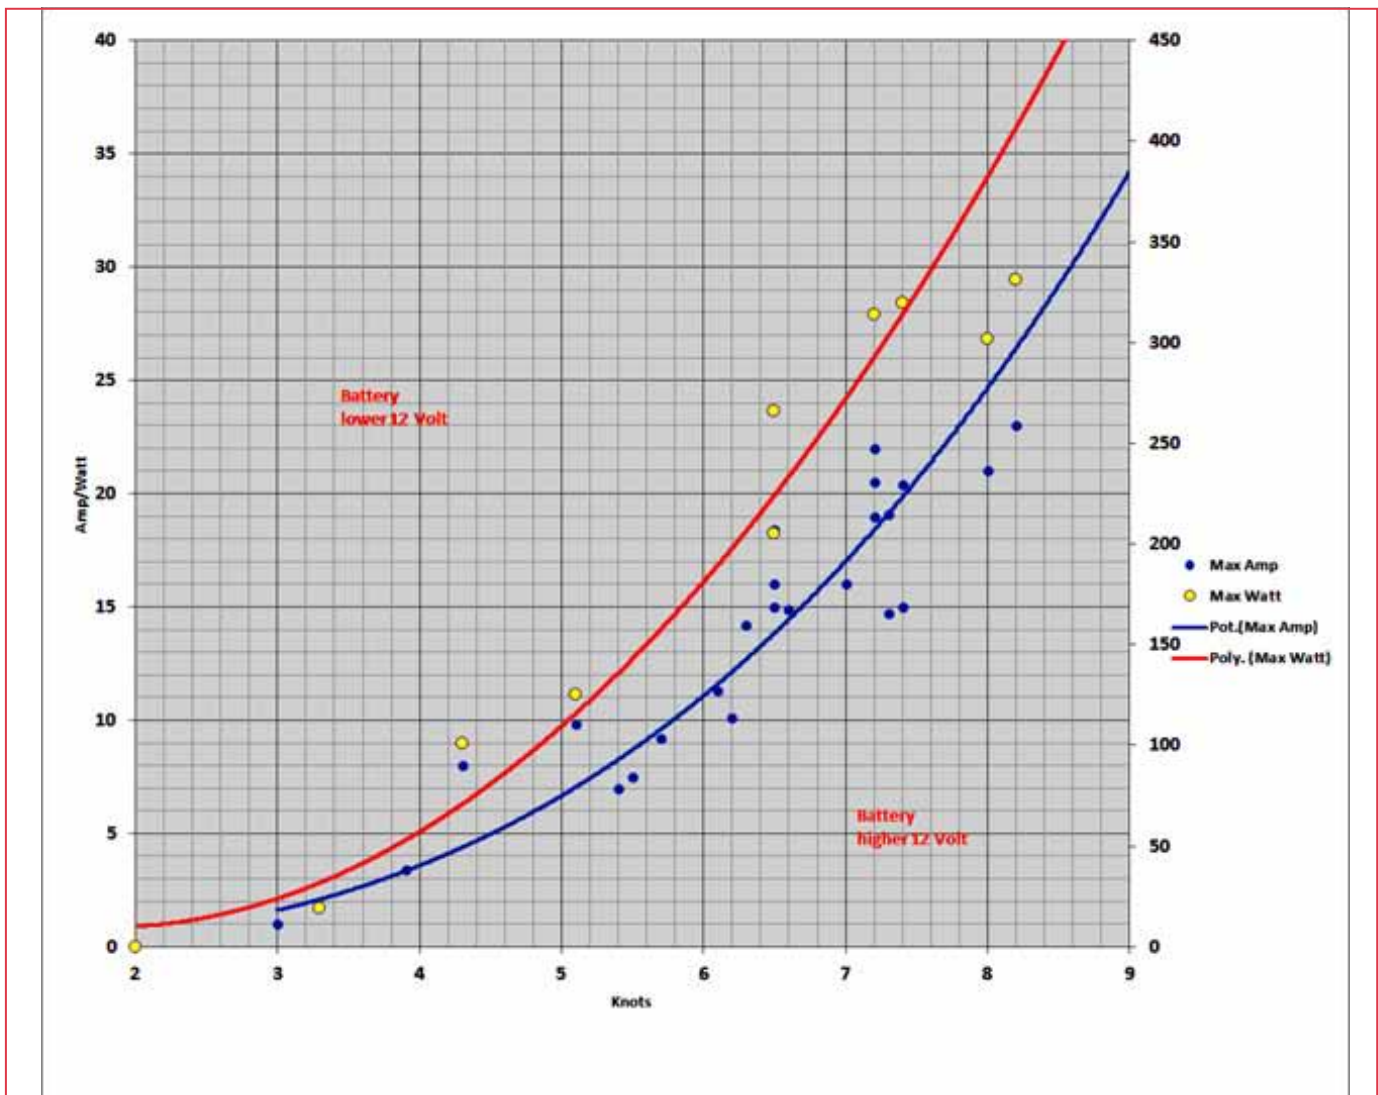

Hydro Charger

Support for swim platforms

Art. No.	7210
Material:	Stainless steel
Measurements:	265 x 70 x 260 mm

Transom bracket system

- Solid stainless steel construction (Aisi 316)
- Quick fastener device for mounting on transom bracket
- Foldable at full speed through 4x reduction ratio line
- Generator locks in working position, no tension on line (easy release means light pulling on the red line)
- Can be stored in fully inverted position (for ex. in harbour)
- Lateral stoppers to avoid generator hitting on transom

Hydro Charger

Hydro Charger

Art. No. 7147 for 12V	Art.No. 7148 for 24V

Basic bracket for transom: Stainless steel bracket with adjustable segment, folding-up with a line. Folding under speed is no problem, because there is a line reduction with 4x ratio. The generator is locked in position when deployed in the water. Quick fastener device for mounting on transom bracket.

Generator with Converter Charger without mounting bracket

Generator part**:**	Gear drive with shaft, propeller and programmable converter charger with digital display and 4 m 3-core cable
Performance:	Generates power from 4 knots (depending on boat speed and adjustment of the propeller blade pitch)
Output:	50 to 500 Watts depending on speed and battery load
Generator Dims.:	Gear drive with shaft and bracket: 1100 x 100 mm, propeller diameter 360 mm

Charger:

Rated Power:	1.000W (Best ratio: Hydro Generator 600W, PV cells 400W)
Applicable batteries:	12V/24V from 200Ah/100Ah (voltage detected automatically)
Battery full charge cut:	16V/32V (adjustable)
Battery low voltage disconnect load:	11V / 22V
Load on voltage:	12,44V (default)
Load current max:	40A (20A at 24V)
No load loss:	≤45mA
Dimensions:	278 x 133 x 75 mm
Weight:	1,6 kg
Working environment:	Working temperature: -10-50°C Relative humidity: 0-90% (no exterior installation, only inside the cabin)
Weight:	Generator, converter charger, basic bracket and propeller: approx. 15 kg

Included in delivery: Generator, converter charger, basic bracket for transom, propeller including transom mount bracket and plug

Art. No. 7220	Additional bracket for transom
Design:	Stainless steel bracket with middle section in plastic and counter plate. Including screws, nuts and security bolt
Dimensions:	260 x 70 x 30 mm Weight: approx. 2 kg

Art. Nr. 7210	Support for swim platform
Material:	Stainless steel
Measurement:	265 x 70 x 260 mm

Scarecrow «Standard»

At last the perfect Scarecrow! No more birds fouling your boat! (Guano)

- For sail or power boats
- No risk to birds
- Compact and easy to stow
- Stainless Steel construction (V4A),
  wires in polyester
- Can be used with SWI-TEC's universal accessories
- Easy to use, deploys and stows quickly

How to deploy:

Mount and secure the Scarecrow. Deploy the polyester wires by pulling the line and that's it! The random movements of the wires and balls stop seagulls approaching. For larger boats you simply use additional Scarecrows.

To stow:

Pull on the other end of the line and the wires will disappear into the tube.

In the case that you wish to use the Scarecrow whilst your boat is covered with a canopy or tarpaulin, you will need to make a 25 mm hole in the material to insert the pole.
The Art. No. 2073/74 is designed to stop water coming through that hole.

Video Demo www.swi-tec.com

Universal railing bracket 2081

2075

Railing bracket telescope

2086   2085

Deck socket

Mounting foot

Scarecrow «Standard»

Art. No.	2070
Material:	Stainless Steel V4A, polyester «wires»
Size:	Length 1,60 m, tube diameter 25 mm, diameter of deployed scarecrow 2,70 m

Accessories

Art. No.	
2071	**Mounting foot**
	Material: PVC / anodised aluminium
2072	**Mounting kit**
	Material: Polyester straps and quick connections
2073	**Cover for canopy/tarpaulin** (blue)
2074	**Cover for canopy/tarpaulin** (white)
	Material: PVC
2075	**Railing bracket telescope**
	adjustable for railing assembly, 1,00 -– 1,50 m (mounts on vertical or horizontal railing bars)
2081	**Universal railing bracket**
2085	**Deck socket top-mount bushing**
2086	**Deck socket installation bushing**
	Material: Stainless Steel V4A

«Universal» Scarecrow including bag

NEW

The new and versatile Scarecrow

The «Universal» scarecrow is composed of a base, 12 polyester rods with small balls at the ends, as well as a mounting flange. The flange is just 15 mm and can be permanently installed in any position with just 2 screws.

The unit is mounted by simply clipping and twisting through the bayonet-lock. Push down the safety bolt afterwards and the scarecrow is ready-to-use.

The polyester rods are individually replaceable and can be removed according to demand, i.e. single rods can be removed for mounting on individual swim platforms.

Universal Scarecrow	
Art. No. 2100	**Universal Scarecrow including bag**
Material:	Nylon, wires polyester
Size:	L = 1,80 m
Diameter open:	Ø ca. 2,7 m
Weight:	0,7 kg
Art. No. 2105	**Canopy bracket**
Material:	Nylon, Plates PVC
Size:	220 x 220 mm
Weight:	0,3 kg
Art. No. 2110	**Rail bracket**
Material:	Nylon, Stainless steel V4A
Size:	Disc Ø = 80 mm
Weight:	0,5 kg

Accessory 1: Rail bracket for «Universal» Scarecrow

The bracket can be screwed on the railing or handrails permanently or just temporarily.

The flange with bayonet-lock is already fitted to the bracket.

Accessory 2: Canopy bracket for «Universal» scarecrow

Many boats will be covered with a canopy when they are not in use. In that case the «Universal» scarecrow can still be used without any problems.

The canopy bracket will be delivered with the flange, 2 plastic plates and screws. In a suitable position cut 2 small holes in the canopy for the screws. The two plates are then attached to each other, one on each side.
The plates with the flange remain permanently attached to the canopy.

Video Demo
www.swi-tec.com

Support telescope

New Development!
Mount the support and secure the scarecrow. Then adjust the height you wish with the telescope. For bigger boats you simply use an additional scarecrow. In case you want to use the product while your boat is covered with a canopy or tarpaulin, you just have to make a 30 mm hole in the material an insert the tube with the additional SWI-TEC accessory.

Support telescope

Art. No.	2111
Material:	Stainless Steel V4A,
Size:	Extendable, Length 0,70 m - 1,3 m, tube diameter 25/30 mm
Weigth:	1,5 kg

Accessories

Art. No.

2081	**Universal railing bracket**
2085	**Deck socket top-mount bushing**
2086	**Deck socket installation bushing** Material: Stainless Steel V4A

Scarecrow for Mast Top

Protect your Mast top, arches etc. from seagulls

Newly developed scarecrow for the top of the mast. The rotating center section provides an even greater deterrent and the angle is adjustable. The scarecrow is also useable on arches, cabin roofs and more.

Scarecrow for Mast Top

Art. No.	2091
Model:	Mast top / Arch
Material:	PVC, Alu Anodised, polyester „wires»
Size:	H = 0,5 m, Ø ca. 1 m
	tube: Ø 22 mm

Scarecrow for Spreaders etc.

Protection for your spreaders!

To protect your spreaders we developed the 50 cm long scarecrows.

The end of the wires are encased in plastic to prevent damage to the sail.

Check when using different sails!

Scarecrow for spreaders

Art. No.	2090
Model:	Spreaders
Material:	PVC, polyester «wires»
Size:	L = 500 mm

Rat Guards for ropes

Prevention is better than Cure!

- Rotating disc
- No more vermin on board
- Easy to use
- Very effective
- Compact
- May be used at anchor or in port
- Also usable for the anchor chain

For the commercial shipping & super yachts
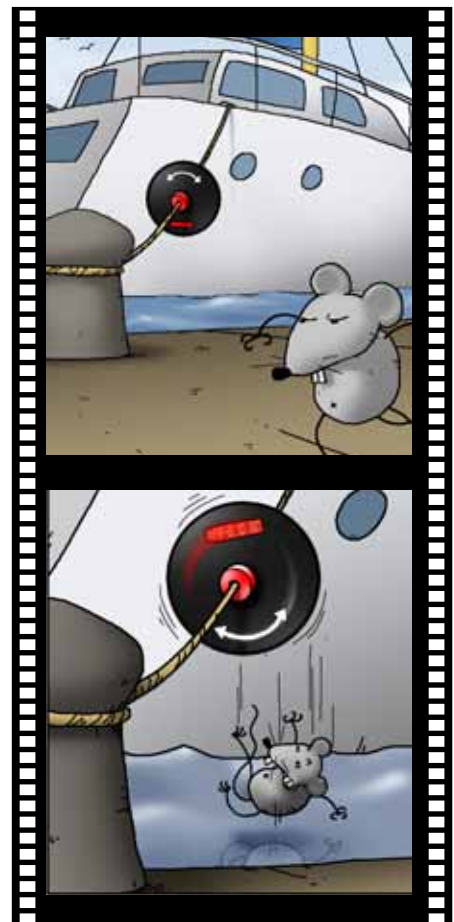

Rat Guards for ropes

Art. No.	1125
Rope size:	up to Ø 75 mm
Size:	Ø 800 mm
Material:	PVC / Polystyrol

Rat Guards for ropes

Art. No.	1122	1124
Rope size:	from 15 mm to Ø 30 mm	up to Ø 45 mm
Size:	Ø 360 mm	Ø 450 mm
Material:	PVC / Polystyrol

Mould Resin

Filling, repairing, fastening and shaping is no longer a problem with our universal Epoxy Putty.

Epoxy putty - repairs anything!
- Cures under water
- Used on all materials
- Cures within 3 hours

Can be used to repair or bond the following:
- Stone, wood, glass, plastic, metal, ceramic etc.
- Repairs both in and out of water
- Fills holes
- Repairs pipes or tanks
- Attachs screws, hooks and repairs stripped threads

Specifications of Mould Resin

Art. No.	5040
Heat-resistant:	up to 200° C
Compressive strength:	up to 800 kg/cm2
Tensile strength:	up to 300 kg/cm^2
Easy to work, cures within 3 hours at 20°C.	

Lifting Harness for outboard-motors

The perfect solution!
- Carry the motor safely and comfortably
- Also for new outboard motors
- The lifting harness can remain attached

Lifting Harness for outboard-motors

Art. No.	4042
used for:	2- to 4-HP-motors
Art. No.	4045
used for:	4- to 20-HP-motors
Material:	100 % polyester
Breaking Load:	100 kg

Fenderholder for stanchions

The perfect place to attach the fenders!

- Fast and easy to attach
- Easy to adjust the height
- The line stops by pressing on the black button
- No more high loads on the life lines
- Now you can use shorter fenderlines
- More attractive, because you don't have any more long lines on the guard rail
- Available for 3 different stanchion diameters: 23 mm (red), 25 mm and 30 mm
- Fender can remain permanently on the fenderholder
- By turning the holder 90°, take it off and stow it completely with fender in a locker
- A really nice gift
- Economically priced in a set of two
- With safety lock

Swing-Away Dinghy Stowage

Art. No.	8030

with wood-support (wood cutting required)
Material: Stainless steel Aisi 316 /
                  Wood (African teak, iroko)
Parts: 2 pieces (right and left) incl. counter-plates
Max. Load: 250 kg every bracket, weight: 24 kg each
Size: Length over all: 1270 mm
                  plates: 250 x 180 x 8 mm
                  length wood: 1000 mm
                  width wood: 60 mm

Removable Dinghy Supports for platforms and decks

The easy and secure way to store your dinghy whilst under way.

Sockets and pad-eyes are attached to the swim platform or deck. The Plugs are attached to the wooden supports so that the dinghy can be stored securely using the straps and pad-eyes.

- Suitable for swim platforms and decks with space for one dinghy i.e. Jetski
- The platform remains free of clutter when dinghy is in the water, the wooden supports are only plugged into place when required.
- The wooden support can be cut to suit any boat profile (delivered as shown in picture).
- Delivered ready for mounting including pad-eyes and straps for securing the dinghy.

NEW

Removable Dinghy Supports for platforms and decks

| Art. No.	8028

The complete set
Material: Stainless Steel V4A / Wood (African teak/iroko)
Contents: 4 Sockets, 4 plugs with bolts, 4 Double
                  Pad-Eyes, 2 Straps, two wooden dinghy
                  supports (cutting required)
Weight: 4 kg
Size: Wooden Support: 600 x 100 x 50 mm
                  Sockets: Diameter Ø 40 mm,
                  Depth: 50 mm

Shroud Clips

Use the shrouds... the space saving stowage solution!

Shroud clip for boathook

- Easy to install
- Boathook is always ready for action
- Velcro fastener included

Shroud clip with hook

- For anything that can be hung
- For securing the gangway at the quarter-deck
- For attaching a tarpaulin or sun shade

Shroud clip for RopeFix

- Suitable for all ropes
- Ropes will dry easily
- Also suitable for a water-hose

Self-Adjusting Anchor Buoy

The Original

Lifting ring to pick up the buoy

Stainless steel (V4A)

SOLAS reflective safety tape to make the buoy visible for everyone in the dark

Specially designed self-rolling strap mechanism

Edge protection for optimum security

Solid but light weight plastic body

Belt with strength up to 1100 Ibs (500 kg)

belt length up to 20 m
Line extension with 10 m belt possible
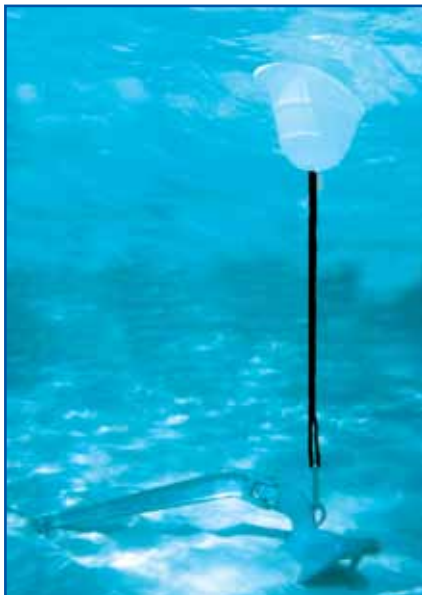

Self-Adjusting Anchor Buoy and Buoy Rack

Mark your anchor with the «ORIGINAL» SWI-TEC Anchor Buoy!

- Often copied but never matched the quality
- More than 20 years on the market!
- To a maximum water depth of 65 feet
- The buoy is always positioned directly above the anchor
- Unique, specially designed self-rolling belt/strap mecanism
- No complicated calculations for guessing the length of line let out
- Tripping the anchor is easy
- A tensile strength of up to 1100 Ibs
- Precisely marks the anchor's set position
- Safety reflector (3M)
- Can function as a tripping line

Your anchor buoy is always ready to use!

- Has been designed especially for the SWI-TEC anchor buoy in stainless steel
- Double spring security clips
- Can be easily attached to the pulpit rails
- Adjustable angle
- **Ideal**: Support can also be mounted in the anchor locker

Video Demo
www.swi-tec.com

Just leave the 2 back parts of the clips and the support can be easily mounted in the anchor locker.

New: line extension for Anchor Buoy

Chain Claw «Standard» and «de Luxe»

NEW

Now also available for Superyacht

Protects your anchor winch and have a good night's sleep!

- Easy to use, with our boathook much easier «de Luxe»
- No more noise from the anchor chain
- The hook can also be released under strain
- Hook the chain and cleat off rope, the strain on the chain and winch is eliminated
- The Chain Claw acts as a shock absorber
- With 5 meter spliced line
- The hook can also be released under strain together with the tripping line («de Luxe»)

To be used in conjunction with a SWI-TEC telescopic boat hook, adaptor or boat hook tip.

Video Demo www.swi-tec.com

The Perfect Combination

Stainless Steel Chain and Chain Marker

cromox®

The **Stainless Steel chain** is the third component in this truly unique Ground Tackle System.
The tensile strength is significantly higher than galvanized steel chain and the polished stainless steel surface has a self-cleaning effect which allows the smooth running of the chain. Technical specifications are listed in the price sheet.

Due to a higher PREN-value we suggest the anchor chain DUPLEX for warmer water like the Mediterranean or Carribean.

Our prices are incl. electropolishing!
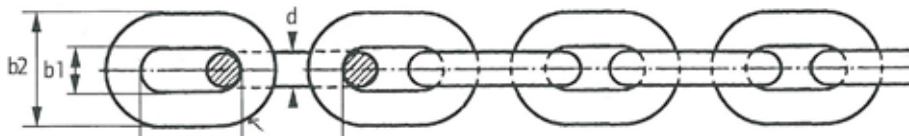

Technical data anchor chain

The Perfect Combination

ORIGINAL Anchor and Powerball

Since its introduction and patenting this **anchor** has been in service world-wide under extreme conditions and has proven to be a super all-purpose anchor:
The ability to set quickly and hold in the most difficult grounds such as mud, clay shale, gravel, rock and seeweed is the principle benefit of this truly universal anchor.

After stringent tests the German Lloyd's issued the certificate: «Anchor with high holding ability».

The **Powerball** is the perfect anchor-to-chain connector. The full swivel ball and socket design permits the rotation around its own axis and swivels up to 30° in all directions. It is considerably stronger than the matching chain and is also certified by German Lloyd's.

Anchor Clearing Hook

Multi-purpose anchor clearing hook...

- Makes it easy to free your anchor if somebody has dropped an anchor line over your anchor chain
- Also can be used as flood hook
- Retrieve your anchor as far as possible
- Includes 3 m spliced lines

Release with the red line remotely.

To be used in conjunction with a SWI-TEC telescopic boat hook, adaptor or boat hook tip.

Video Demo
www.swi-tec.com
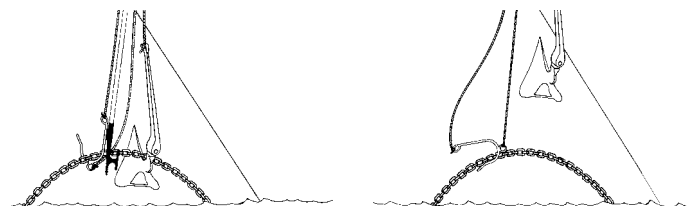

Anchor Clearing Hook

Art. No.	1032
Load:	1000 kg
Supplied with:	2 x 3 m spliced line Ø = 10 mm
Size:	140 x 280 mm
Weight:	0,8 kg
Material:	Stainl. steel (V4A), Ø 12 mm

Line Hook for Lazy-lines

With this hook docking in a harbour is child's play!
The quickest, easiest and cleanest way to moor!

To use:

1. Line hook is attached to the Boat hook, reach down or out and snap it over the lazy-line.
2. Then remove the Boat hook and let the Mooring line hook sink to the bottom, holding the lead line, which remains attached to the Mooring line hook and walk to the bow of the boat.
3. Lift the Mooring line and cleat it down.
4. Mooring can't be done more easily or quickly.

To be used in conjunction with a SWI-TEC telescopic boat hook, adaptor or boat hook tip.

- No more barnacle cuts
- No more dirty clothes
- No more dirty deck
- 5 m spliced line

Video Demo
www.swi-tec.com

Line Hook for Lazy-lines

Art. No.	1030
Material:	Stainless steel (V4A)
Load:	500 kg
Supplied with:	5 m line, Ø 10 mm
Size:	160 x 260 mm
Weight:	0,8 kg
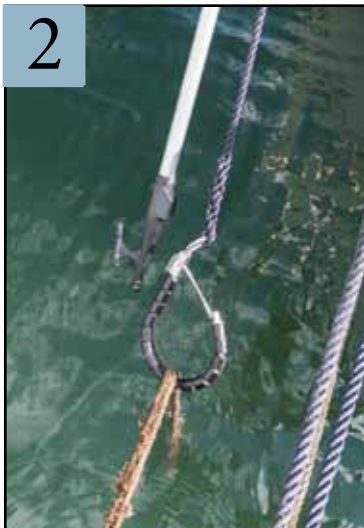

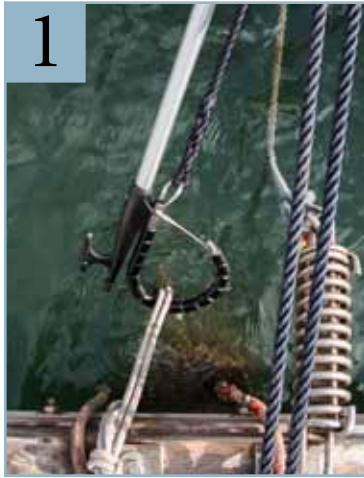

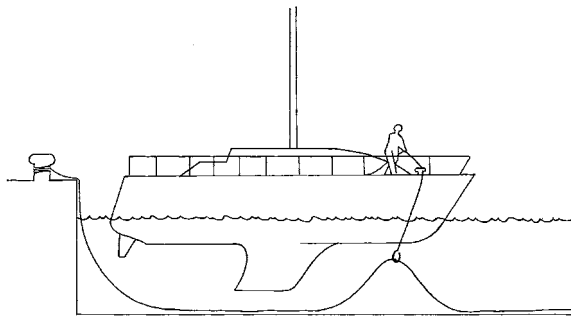

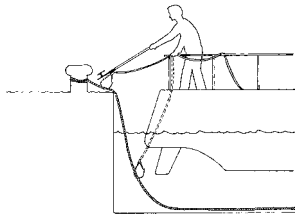

Mooring Buoy and Retrieving Hook

To attach a buoy quickly, easy and safely!

- Two hooks in one
- Easy release from moorings (trip line included)
- Easy tying up in locks
- Simply clip on to the ring of the buoy and cleat off the line on board
- By tightening the screw you can retrieve the anchor buoy or other items that may have fallen over board
- Both sizes include 10 m spliced lines
- Available in two sizes

To be used in conjunction with a SWI-TEC telescopic boat hook, adaptor or boat hook tip.

**Video Demo
www.swi-tec.com**

Tip:

Up to 8 tons you should chose the standard size.

More than 8 tons we recommend the heavy-duty version.

Important: Don't use it for permanent tie-up!

1031   1034
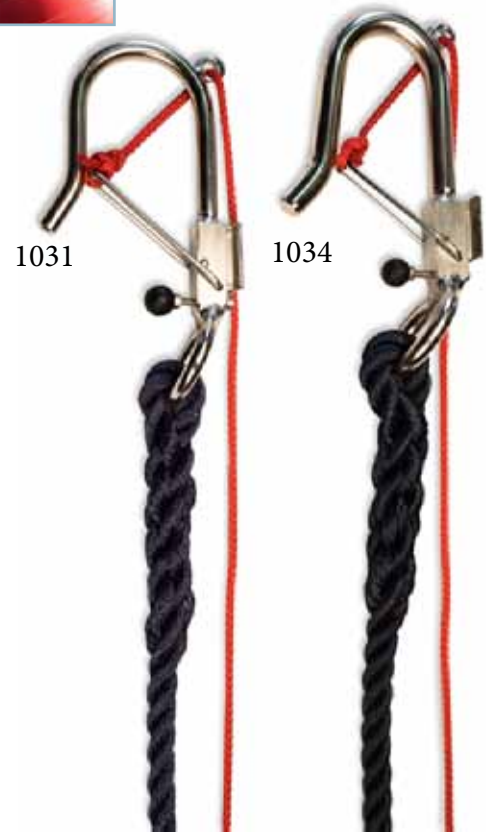

Mooring Hook

Art. No.	1031 Standard	1034 Strong

Material:	stainless steel Ø 10 mm	stainless steel Ø 14 mm

Mooring Buoy Catch Hook

The ideal way to pass a line through the ring.
- Easy to attach to mooring buoys and rings
- Easy to attach on any buoy directly around its sinker chain or rope
- Quality stainless steel
- Accommodates any size line

Tip:

The Mooring Buoy Catch Hook is not intended for rough conditions. In these conditions we recommend using the Mooring Buoy Retrieving Hook.

To establish a temporary mooring and then you can use the Mooring Buoy Catch Hook safely and easily to pass rope round the buoy from distance.

To be used in conjunction with a SWI-TEC telescopic boat hook, adaptor or boat hook tip.

NEW
